

BJT Test Scores Now Being Accepted in Japan Visa Eligibility Assessments

The BJT Business Japanese Proficiency Test has been added as one of the officially recognized tests for Japan Certificate of Eligibility applications. Previously, only the Japanese Language Proficiency Test (JLPT) and other select tests were accepted in such assessments. BJT scores of 400 or higher (Japanese Listening and Reading Comprehension Test portion of the BJT) will be equivalent to JLPT level 2 or higher; scores of 300 or higher will be equivalent to JLPT level 4 or higher. For those applying for study in Japan, BJT scores are accepted in Certificate of Eligibility assessments for school terms starting in July 2008 or later.
